

Revolutionary. Convenient. Economical.

ADVANCED 2000

COMPACTOR & BALER

Advanced 2000 is an innovative development in waste reduction technology.

The compactor/baler combination minimizes waste at the point of generation. Its space saving design and minimal electrical requirements allow it to be located anywhere. Roll in the compatible sixty-four gallon wheeled cart, swing the trolley over to bale and you are in business!

Two models

Single chamber/compactor **or** baler
Double chamber/compactor **and** baler

WHAT ELSE YOU NEED TO KNOW

Reduces cost through waste reduction & recycling

Achieves a compaction of 6:1 (pretty awesome)

Space saving and energy efficient

Easy, simple, and secure.

SPECIFICATIONS

Dimensions: 65" wide x 30" deep x 84" high

Power: 110/115V - 50/60 cycle

Container size: 64 gallon roller type

Top load opening (compactor): 24"x 16"

Weight of compacted material: 175-225 lbs

Frame: 2" square by 3/16 wall structural steel tubing

Electric: Push button controls using U.L. listed components

Motor/pump: Hydraulic 2-stage - 1 horsepower - high torque

Weight: 1,200 pounds

Platen force: 8,600 pounds - 1750 PSI

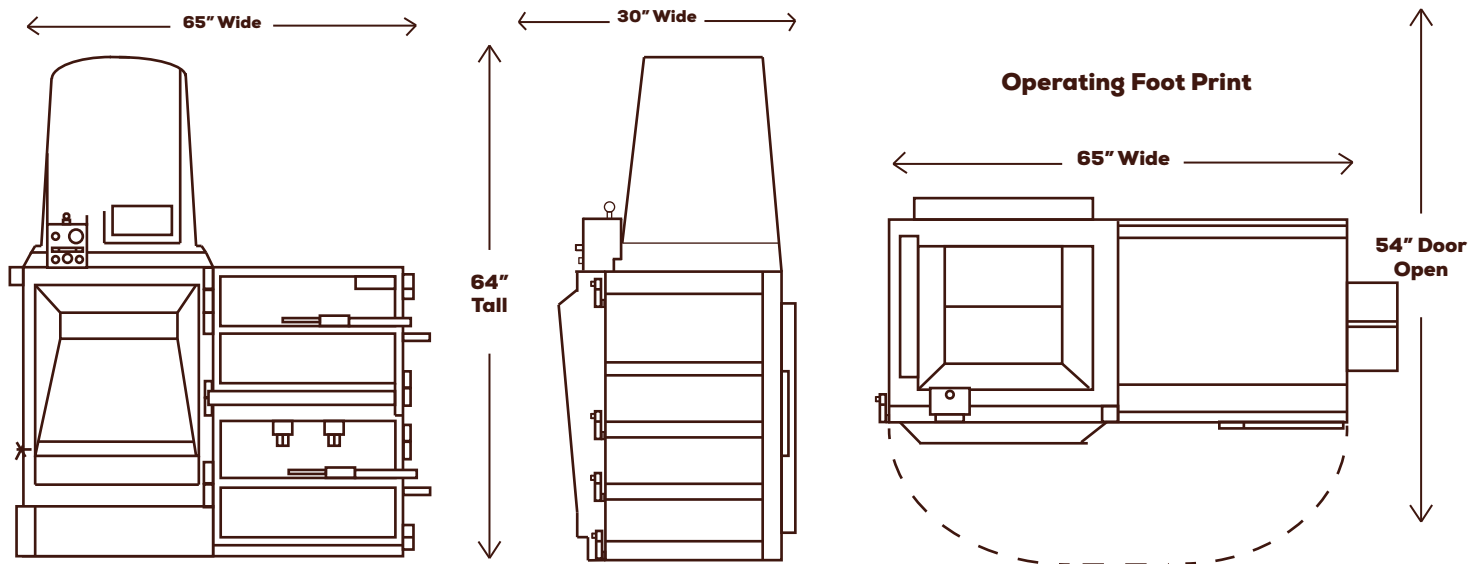

Platen Construction: 5/8" solid steel

Loading door (baler): 26 1/2" x 21"

Weight of baled material: 40-100 pounds

Walls: Continuous welded steel plate

Cylinder: 2 1/2" diameter hardened steel
