

BINPAK[®]

COMPACTORS

***It's time to take out the trash!
...and that includes your old waste equipment***

You deserve the benefits from a 21st century solution
BINPAK can fix your trash troubles
And like most really good ideas
The best ones are surprisingly simple!

waste | cardboard | recycling

The 6-yard waste container with built-in compaction using patented technology

SPECIFICATIONS

A: Height – Overall	83 in
B: Load Height (Standard)	26 in
C: Width – Overall	83 in
D: Depth – Overall	64 in
Fill Door Opening	20 x 32 in
Weight (approximate)	1255 kg / 2760 lb

ELECTRICAL SINGLE PHASE THREE PHASE

Volts	208-230	208-230
Amps	30	30

Single or three-phase available at time of order

PERFORMANCE

Cycle Time		52 sec.
Compaction Ratio	waste	up to 6:1
	cardboard	up to 4:1
	recyclables	up to 8:1

CAPACITIES

Volume	6 cubic yard
--------	--------------

Meets or exceeds CSA SPE-1000 standards, is ESA approved and TUV/UL certified as complying with specific ANSI/UL safety standards.

Reduce your overall waste cost

The high compaction ratio of BINPAK, combined with the ergonomic design, reduces your monthly costs.

Optimize your recycling options

BINPAK optimizes recycling options with a solution that improves the handling of your recyclable materials including cardboard and mixed recyclables. Eliminate multiple containers that take up space, or multiple pickups, by compacting recyclables instead with the BINPAK compactor.

Improve neighbor relationships

Attractively designed, BINPAK is a sealed unit that prevents waste from spilling out and causing unsightly areas on the property.

Addresses environmental concerns

The design of the BINPAK compactor keeps trash, odours and liquids contained. The BINPAK also keeps out pests and animals such as racoons, birds and wasps.

Improve staff health and safety

With a low loading height of 26", BINPAK compactors make handling easier for staff with less lifting and less spillage. Musculoskeletal injuries, such as those from heavy lifting, are the primary reason for workplace injuries.

Prevent unauthorized dumping

BINPAK is a secure, fully-enclosed compactor that prevents unauthorized dumping and vandalism.

Reduce truck traffic

By condensing volume, BINPAK compactors require fewer pickups per month with a front-load truck. Fewer pickups means less congestion and traffic disruption in parking areas and access lanes, improving safety for staff, suppliers and visitors.

Simple to install and easy to relocate

BINPAK does not require any guides, rails, pads or lag bolts – simply connect the electrical plug end using 30 AMP/208-240 VAC/single phase power and it is ready to go! Need to move your BINPAK? No problem! You will just need to relocate your electrical power source and move the bin to the new spot.

Improve operational efficiency with **BINPAK!**

Quick emptying cycle times with one electrical connection and auto re-latching lid.
